

A Breakthrough Orchestration Platform for Age and Identity Verification

Veratad VX is an easy-to-use platform that lets you create bespoke end-to-end verification journeys through a simple drag and drop experience.

ROBUST CAPABILITIES & SOURCES

Build a flexible verification process with the most robust suite of identity and age verification methods and the industry's best mix of data providers.

LOW-CODE INTEGRATION. NO-CODE ORCHESTRATION.

With VX, your business gets a full-featured, no-code orchestration available via a single, simple integration.

▶ **THE RIGHT JOURNEY. RIGHT AWAY.**

Instantly deploy proven community verification templates built by leaders in your industry. Or orchestrate bespoke verification workflows to suit your business needs. Automate testing and deployment in the real world. Understand and act on evolving consumer behavior and risk signals with in-depth reporting and analytics.

▶ **VERIFICATION, MADE PERSONAL.**

You've worked hard to build marketing funnels and customer journeys that work for your audience. A verification step shouldn't be any different. Deliver personalized journeys that minimize onboarding or purchase friction while ensuring security and preventing fraud. You can even change verification methods dynamically based on user behavior, demographics or technology. If CX matters, you need VX.

Build it your way. Build it fast. Control everything.

Veratad VX makes it easy to deliver personalized journeys that minimize onboarding and purchase friction. All while ensuring security and preventing fraud.

A background illustration at the bottom of the page showing a row of diverse human silhouettes in various colors (blue, grey, green, orange, purple) against a light blue background. Some silhouettes have a checkmark above them, suggesting successful verification.

VERATADVX

We've Put The **Power** in Your Hands with Features That Include...

Powered by IDR5

Leverage the industry-leading power of our IDR5 verification engine. IDR5 synthesizes dozens of providers and verification methods, giving you access to best-in-breed technology through a single integration. No point solutions, no calling multiple vendors - VX and IDR5 give you access to everything you need to prevent fraud, stay compliant and thrill your customers.

No-code orchestration

Create sophisticated, multi-touch customer workflows without ever touching a line of code. Data sources and providers are pre-integrated with the platform, allowing you to choose from a set of journey templates or build your own from scratch without any need for engineers.

Flexible deployment options

Deploy Veratad VX directly into your web or mobile application with a web SDK or native SDK, or integrate it using a RESTful JSON API. Our SDKs come with responsive, customizable screens pre-configured for every customer journey.

Actionable analytics

Get you up-to-the-minute insight into customer behavior and drop-off points thanks to a powerful reporting and analytics dashboard. This lets you tune your journeys to maximize success rates and remove roadblocks. Advanced options like A/B/n testing and device and geo-targeting let you create truly personalized workflows.
